

ODO-CIDE

POWERFUL IODINE DISINFECTANT SANITISER FOR THE POULTRY INDUSTRY

Iodo-cide is a controlled releasing complex that has a multifaceted action as a disinfectant and deodorant. Iodo-cide has for a many years been proven and recognised to be a cost effective and potent disinfectant. Iodo-cide is a major tool in maintaining good sanitary conditions in hatcheries and poultry broiler sheds. Iodo-cide is effective against bacteria, spores, yeast, fungi, mould and a range of viruses.

BENEFITS:

- APVMA Approved disinfectant & Passes European Standard EN 1656.
- Bactericidal, fungicidal and virucidal - Total protection
- Low viscosity, suitable for all manual and automatic systems
- Colour indicated: colour fades as iodine diminishes
- Stable formulation - completely water soluble
- Biodegradable

DIRECTIONS FOR USE:

AREAS	DILUTION RATE	METHOD
BUILDINGS Hatcheries, & Broiler sheds	6ml per litre cold water 120ml per 20L	Use after cleaning. Spray or scrub over entire area.
FOOT BATHS	5ml per litre of water 100ml per 20L	Colour indicative - change daily or when colour fades.
FOGGING OR MISTING	4 ml per litre 80ml per 20L	Fine misting can be carried out without removing poultry.
EQUIPMENT Trays, Crates, & Self-Water Units	4ml per litre of water 80ml per 20L	Spray or dip clean equipment. Allow 2min dwell time before rinsing.
INCUBATOR - HATCHERY	5ml per litre of water 100ml per 20L	Apply by spray or swab to clean equipment.
DRINKING WATER SANITATION	0.5ml per litre of water 5 ml per 10L	Allow to properly disperse and activate. Replace when colour disappears.
